Peter's Honey					
Piratjal Rimada					
Ponte Tresa					
Sequoia	Large, flat, bell-shaped	Light green -yellow skin & amber flesh	Mild, sweet flavor with soft, crunchy seeds	Medium size	UC Riverside introduction. Develops a Breba and second crop in most years
Sultane					
Unknown Pastiliere	Small to medium fruit	Dark red skin, red flesh	Outstanding dark cherry & blackberry flavor with an acidic bite		Called "unknown" because it was supposed to be Pastiliere but turned out different (and better). It appears to be a smyrna-type, <b><i>NOT self-fertile</i></b> , can drop fruit
Violette de Bordeaux	Small to medium tear-drop shaped	Black fruit with deep red flesh	Tastes like Raspberry jam	Small tree 8'	Like a miniature version of Black Mission, good for container growing, closed eye, early Breba crop, very productive, good for coastal areas
